VOL. LII

PIOCHE, NEVADA, FRIDAY, JUNE 21, 1901.

NO. 1.

THE OPTIMIST'S VIEW.

The late Benjamin Harrison's estate was found to be less than half a million dollars. Harrison, if you remember, was only a President of the United States; of course, had he been a "steal magnate," but what's the use?

The Legislature of Michigan has at last decided to adjourn. Not that we blame them for holding on to a good thing, but it is rather tough on the citizens of Michigan to be relieved of one burden in time to succumb to another. For it will soon cease to be a question of how would you like to be a Senator? but once more, "how would you like to be the ice man?" Of course both cut a good deal of ice, but there is that much difference between them: An ice man plays a game of freeze-in. A legislator is an expert in the freeze out line.

A fellow often thinks that life is worth living till he goes up against a fashionable boarding-house.

Some people are like cherries—either too green for any use, or too ripe for actual use. But, unlike cherries, they cannot be canned. And this is why you often hear a man exclaim in disgust: "Now, wouldn't that jar," etc. It does.

The prettier the girl, the greater the conceit. The handsomer the man, the greater the end.

The old family of Smiths occupies thirty-five columns in the newly-issued Denver directory. Should they decide to leave, Denver would be too proud to make inquiries why the Smiths left home. Because they, probably, couldn't take it with them as a good reason. A better one is that Mac's are crowding them out. The latter take up eighty columns in the same directory. Long may they prosper!

No man is a hero to his own sister, and no woman is an angel to her own husband. No matter what he does, her chum's brother can go him one better. No matter how hard a wife tries to raise wings, her husband will clip them by simply trying to encourage her.

If you cannot be an optimist, don't become a pessimist. Rather be indifferent. Wait till you marry—it will be time enough to decide on the proper course, then.

If it be true that Senator Clark has a lake of petroleum, the swans in that lake must be made of asbestos and the song they sing must be something like the classical air, "There will be a hot time," etc. Still for a man with such resources, is it not strange that his path should not be smoother?

A torpedo boat has been named Depew in honor of the only Chauncey. It is not stated whether the torpedo is supposed to "crack" jokes like Chauncey, himself, or something stronger than that. At any rate, it is safe to assume that it will be as much in "the swim" as the man who name it bears.

Jefferson an Inventor.

Thomas Jefferson produced many inventions. He devised a folding chair which he used to carry to church when the services were held in the house at Charlottesville, where the seating arrangements were insufficient. The chair was composed of the now familiar three sticks, which, being unfolded and covered with a piece of cloth, made a tolerable seat or camp stool. He is also credited with the revolving chair, which is now such a familiar and necessary article of office furniture. At the time it was stated that Jefferson had devised this chair so that "he could look two ways at once." He also invented the copying press, and he sent one of his own devising to Lafayette as a present. He invented a hemp break, a pedometer and a plow. The latter received a gold medal in France in 1790. He sent the original design to the Royal Agricultural Society of the Seine, and they awarded a medal for it. Eighteen years afterward the society sent him a superb plow containing his improvement.

Chilblains Too.

My daughter has used Trib to relieve chilblains, and I have not known it to fail to give immediate relief. W. W. Ellis, Sacramento, California.

Red Polled Cattle.

Red Polled cattle are natives of Norfolk and Suffolk counties in England. For many years they were two distinct breeds, in these counties. Various theories have been put forward to account for these hornless cattle. The probability is that in several varieties of Red Polled cattle found in England many years ago, we have the descendants of a very ancient breed, highly valued for their large yield of milk. The Herd Book says: "There is even yet a sort of superstition regard for red cattle prevalent among some of the peasantry the roots of which superstitious ahaeologists profess to find in the religious belief of the Aryan race, that red typifies the heavenly fire. At any rate it is an undisputed fact that in the middle ages and down to a comparatively recent period the dun or dark red cow (for the terms seem to have been convertible with regard to cattle) was often invested with remarkable powers—her milk was deemed superior and was supposed to possess health restoring qualities.

"Herodotus carried back the record of polled cattle to a remote period.

"Hippocrates, speaking of the Scythian chariots, says 'they were drawn by oxen which have no horns and the cold prevents their having any.'

"The probability is that Britain derived both its polled cattle and its trotting horses from the same source.—The folks who settled in Eastern England after the Romans had gone."

Of the Suffolk Polled John Kirby who published the Suffolk Travelers of 1734, speaks of the butter produced in the dairy district as being "the best and pleasantest in England." Arthur Young, in his "Surrey of Suffolks," published in 1794 mentions the breed and of milk yield says:

"There is hardly a dairy of any consideration in our district that does not contain cows which give, in the height of the season, eight gallons of milk in a day, and six are common among many for a large part of the season. For two or three months a whole dairy will give five gallons a day on the average."

The Iri R. Hicks 1901 Almanac.

Whatever may be said of the scientific causes upon which the Rev. Iri Hicks bases his yearly forecasts of storm and weather, it is a remarkable fact that specific warning of every great storm, flood, cold wave and drought, have been plainly printed in his now famous Almanac for many years. The latest startling proof of this fact was the destruction of Galveston, Texas, on the very day named by Prof. Hicks in his 1900 Almanac, as one of disaster by storm along the Gulf coasts. The 1901 Almanac, by far the finest, most complete and beautiful yet published is now ready. This remarkable book of near two hundred pages, splendidly illustrated with charts and half-tone engravings, goes as a premium to every subscriber who pays one dollar a year for Prof. Hicks' journal, Words and Works. The Almanac alone is sent prepaid for only 25c. Order from Word and Works Publishing Company, 2201 Locust Street, St. Louis, Mo.

The frontier defense of the Roman Empire between the Danube and the Rhine has been under examination by a royal commission for eight years, and the work is nearly completed. At Carnuntum, in Austria Hungary, an ancient bakery has been discovered. The room contained two baking ovens and a row of charred, completely preserved bread loaves, measuring 29x32 centimeters, says The American Journal of Archaeology. Ancient bread has been known hitherto only from Pompeii.

Los Angeles, Cal., June 15th—Judge York of the Superior court handed down a decision this morning in the right of way contest between the Southern Pacific Railway company and the city of Pomona. The decision is to the effect that as the portion of First street involved in the controversy has been used as a public highway continuously for more than five years, it belongs to the city. This gives the municipality the right to grant a franchise over the disputed territory to the San Pedro, Los Angeles and Salt Lake road, which is seeking a right of way through Pomona.

Dr. L. F. Barker, a pathologist of Chicago, who has made quite a study of plague condition, seems to think the world is soon to have a great epidemic.

F. H. McNamee Plaintiff.

vs.

The Mineral Union Limited, a corporation, Defendant.

By virtue of an execution issued out of the Fourth Judicial District Court, of the State of Nevada, in and for the County of Lincoln, dated the 2nd day of January, A. D. 1901, in a certain action wherein F. H. McNamee, as plaintiff recovered judgment against the Mineral Union Limited, a corporation, defendant, for the sum of one thousand and fifty-nine dollars, lawful money, and costs of suit, taken at Four hundred and seven and 25-100 (\$407.25) dollars, on the 12th day of December, 1900.

I have levied upon the following described property, to-wit: All that certain mine, mining ground and claim 300 feet in width by 1500 feet in length, situate three hundred feet south of Good Springs, in the Yellow Pine Mining District, Lincoln County, Nevada, together with all the improvements thereon, consisting of Mills, buildings, machinery, pump, ice plant, water piping, and all fixtures of whatever nature attached to the said mine, together with the boundaries of said claim, being hereinafter located and recorded as the Hirschfeld Lode Mining Claim.

Notice is hereby given that on Monday the 11th day of February, A. D. 1901, at 10 o'clock P. M. of said day, in front of the Court House, at the town of Pioche, in the County of Lincoln, State of Nevada, I will sell all the right, title and interest of the said Mineral Union Limited, a corporation, in and to the above described property, at public auction for cash, lawful money, to the highest and best bidder, to satisfy said execution and all costs.

JACK JOHNSON, Sheriff, Lincoln County, Nev.
